

| Schedule - I                                                   |
|----------------------------------------------------------------|
| (As per PNGRB Access Code Regulation for Natural Gas Pipeline) |

| Format for Declaring Capacity of Pipeline |                                                                                                                       |                                                                           |
|-------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------|
| 1                                         | Name of entity:                                                                                                       | GSPL India Gasnet Limited                                                 |
| 2                                         | Name of pipeline:                                                                                                     | Bhatinda - Gurdaspur Natural Gas Pipeline                                 |
| 3                                         | Section wise capacity on the pipeline (to be furnished for each section separately) :                                 | Pipeline under construction*                                              |
| (a)                                       | Number of sections:                                                                                                   |                                                                           |
| (b)                                       | Name of section with start and end point:                                                                             |                                                                           |
| (c)                                       | Capacity - (i) Volume terms (ii) Energy terms                                                                         |                                                                           |
| 4                                         | Number of AHAs:                                                                                                       | 1 Nos.                                                                    |
| 5                                         | Number of entry points on the pipeline route:                                                                         | 1 (as on 01-08-2026)                                                      |
| 6                                         | Location of entry points:                                                                                             | Jalandhar                                                                 |
| 7                                         | Number of exit points:                                                                                                | 4 (as on 01-08-2026)                                                      |
| 8                                         | Location of exit points:                                                                                              | Amritsar, Gurdaspur, Kapurthala & Jalandhar                               |
| 9                                         | Entry point wise capacity                                                                                             | 33.93 MMSCMD                                                              |
| 10                                        | Exit pointwise capacity                                                                                               | Based on the Entry point Capacity                                         |
| 11                                        | Technical parameters:                                                                                                 |                                                                           |
| (a)                                       | Inlet pressure at entry point:                                                                                        | Bathinda - Not less than 88 Bar(g)<br>Jalandhar - Not less than 40 Bar(g) |
| (b)                                       | Calorific value band at entry point:                                                                                  | 8853.83 - 10517.58 Kcal/scm<br>(on GCV Basis)                             |
| (C)                                       | Temperature:                                                                                                          | ≤55°C                                                                     |
| (d)                                       | Other elements as per Schedule - II:                                                                                  | As per PNGRB Guidelines                                                   |
| (i)                                       | Hydrocarbons dew pt (Degree Celsius, max.)                                                                            | 0                                                                         |
| (ii)                                      | Water dew pt. (Degree Celsius, max)                                                                                   | 0                                                                         |
| (iii)                                     | Hydrogen Sulphide (ppm by wt. max.)                                                                                   | 5                                                                         |
| (iv)                                      | Total Sulphur (ppm by wt. max.)                                                                                       | 10                                                                        |
| (v)                                       | Carbon dioxide (mole % max.)                                                                                          | 6                                                                         |
| (vi)                                      | Total inerts (mole %)                                                                                                 | 8                                                                         |
| (vii)                                     | Temperature (Degree Celsius, max.)                                                                                    | 55                                                                        |
| (viii)                                    | Oxygen (% mole vol. max.)                                                                                             | 0.2                                                                       |
| 12                                        | Status of extra capacity available in the pipeline system on common carrier basis:                                    | Pipeline under construction                                               |
| 13                                        | Details of common carrier capacity being used by transporter itself or on contract carrier basis:                     | Pipeline under construction                                               |
| 14                                        | Any demand pending with the transporter for common carrier usage of the pipeline alongwith duration of such pendency: | Pipeline under construction                                               |
| 15                                        | Preference on entry and exit points:                                                                                  | -                                                                         |

\* As declared by PNGRB vide its letter Ref. Infra/PL/BID/BJSP/01/2011 dated 07.07.2011 - out of total authorized capacity, partial capacity has been commissioned
